## 實時天氣報告

The screenshot shows the real-time weather report interface. At the top, it displays the date and time: Tuesday, 20 May, 2008, 15:53. The main display shows the current temperature as 21°C and 97% humidity, with a cloud and rain icon. Below this, it says "五天天氣預報" (5-day weather forecast) and "最後更新時間: 2008-05-20 15:00". There is a refresh button (circular arrow icon) in the top right corner of the weather widget. At the bottom of the widget, there is a "生效警報" (Active Alerts) section with a red warning icon. The interface also includes a taskbar at the bottom with icons for calendar, phone, and other services, and the text "行事曆" (Calendar) and "EndKey" at the very bottom.
